Leman Credit Circle

Knowledge is about being
open to new experiences!

The one who does not share, will gain less!

What is the LCC?

The Leman Credit Circle (LCC) is a so-called credit peer group or credit interchange group, a group of colleagues active in the field of credit management, whether that is risk, collections and/or cash management.

All members represent a Multinational company based in the Lake District but active in multiple countries. Within the LCC one can find a large variety of Industries whereas the largest number of participants can be found in the pharmaceutical sector.

Why is there a LCC?

Many of the credit representatives are member of some kind of organization or association but these have their meetings mostly in another country thus involving travel and being out of the office for a number of days. A meeting with peers in this region thus makes sense, as it will save considerably on the travel expense and, above all, a lot of time!

Are there any obligations?

Yes, there are but those are limited to being prepared & willing to share his/her experience with colleagues. The field of credit is an industry segment in which the circumstances and practices can change rapidly. No educational programs or publications are able to keep us up to date and therefore a group of experts in their field helping each other to further improve (thus avoiding unnecessary risks) has a true value.

However, with all of this though we will stick to the rules as outlined by the European Community, thus no sensitive information with regard to strategy and/or customers will be shared nor discussed!

What does it cost?

The annual contribution is CHF330, which includes all of the offerings mentioned hereafter.

The offering in a nutshell

Networking

The members have agreed to physically meet twice a year, once during spring and once during late autumn. These meetings normally will take place at an office of one of the members, lasting half a day, either a morning or afternoon, and can be accompanied by a lunch or snack.

The Administrator will take care of the agenda, chair the meeting, make sure all is in line with the official regulations and prepare/distribute the minutes. The agenda is based on input from the members and may include a presentation by a third party.

LCC Group within LinkedIn

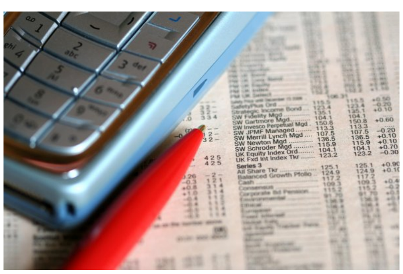
Within the business community LinkedIn, a group named LCC had been created. In that group, members are able to ask questions to their fellow-members or share any other 24/7.

One also has the possibility to place a job vacancy and it does not require an in-depth knowledge. The Administrator obviously can assits here.

Access to a large Network

Never wait for the bad weather to surprise you but when that happens …

The Administrator, who has been active in the credit field for over 30 years as a Global Credit Risk Mgr of a multinational as well as Director Global Markets of a Receivables Management Co., makes his large network and knowledge available to any of the members. Whether one is looking for a specific service provider in the information, credit insurance, brokerage, collection industry or just would like to have an opinion from another colleague within his/her industry (but based outside the LCC circle), one just needs to ask.



Any other

The members will receive regular updates of the members with all related contact information. Next there will be a Newsletter in those quarters when there is no physical meeting scheduled.
